

BEFORE INVESTING YOU SHOULD CAREFULLY CONSIDER THE FUND'S INVESTMENT OBJECTIVES, RISKS, CHARGES AND EXPENSES. THIS AND OTHER INFORMATION IS IN THE PROSPECTUS, A COPY OF WHICH MAY BE OBTAINED FROM 888-318-0133 OR WWW.VERIDIENGLOBALINVESTORS.COM PLEASE READ THE PROSPECTUS CAREFULLY BEFORE YOU INVEST.

THIS ETF IS DIFFERENT FROM TRADITIONAL ETFs. Traditional ETFs tell the public what assets they hold each day. This ETF will not. This may create additional risks for your investment. For example:

- You may have to pay more money to trade the ETF's shares. This ETF will provide less information to traders, who tend to charge more for trades when they have less information.
- The price you pay to buy ETF shares on an exchange may not match the value of the ETF's portfolio. The same is true when you sell shares. These price differences may be greater for this ETF compared to other ETFs because it provides less information to traders.
- These additional risks may be even greater in bad or uncertain market conditions.

The differences between this ETF and other ETFs may also have advantages. By keeping certain information about the ETF secret, this ETF may face less risk that other traders can predict or copy its investment strategy. This may improve the ETF's performance. If other traders are able to copy or predict the ETF's investment strategy, however, this may hurt the ETF's performance.

Portfolio Transparency Risk/ETF Risks. Unlike traditional ETFs, the Fund does not tell the public what assets it holds each day. Instead, the Fund provides a verified intraday indicative value (VIIV), calculated and disseminated every second throughout the trading day. The VIIV is intended to provide investors with enough information to allow for an effective arbitrage mechanism that will keep the market price of the Fund's shares trading at or close to the underlying net asset value (NAV) per share of the Fund. There is, however, a risk, which may increase during periods of market disruption or volatility, that market prices will vary significantly from the underlying NAV of the Fund. Similarly, because the Fund's shares trade on the basis of a published VIIV, they may trade at a wider bid/ask spread than shares of ETFs that publish their portfolios on a daily basis, especially during periods of market disruption or volatility, and therefore, may cost investors more to trade.

Climate Change Consideration Risk. Applying climate change and other filters to the investment process may exclude securities of certain issuers for non-investment reasons and therefore the Fund may forgo some market opportunities available to funds that do not use these criteria. As a result, at times, the Fund may underperform funds that are not subject to similar investment considerations.

Decarbonization Technologies Risk. Various technologies and processes are being developed for use by companies seeking to reduce GHGs. There can be no guarantee that these technologies or processes will be successfully implemented and achieve goals of lower GHG emissions.

Foreign Securities Risk. Investments in securities of non-U.S. issuers involve certain risks not involved in domestic investments and may experience more rapid and extreme changes in value than investments in securities of U.S. companies.

Models and Data Risk. The composition of the Fund's portfolio relies, in part, on proprietary investment models as well as information and data supplied by third parties ("Models and Data"). When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to the

inclusion or exclusion of securities from the Fund's portfolio that would have been excluded or included had the Models and Data been correct and complete.

New Fund Risk. The Fund is a recently organized management investment company with no operating history. As a result, prospective investors do not have a track record or history on which to base their investment decisions.

The fund is not yet live and holds 0.00% of the companies named in the podcast.

Veridien Global Investors LLC serves as the subadvisor to the ETF and is a Registered Investment Advisor of Foreside Fund Services, LLC, which is not affiliated with Veridien Global Investors LLC or its affiliates.
